Supllier

Dummy task 2
Dummy task 3
Dummy task 4

Actions

+ Get_job
+ Get_jobs
+Accept_job
+ Reject_job
+ upload_job

I did not communicate with API functions

API

Only one task

when i apply the communication between Supplier and API's Client by API functions, the work flow will be below:

Supllier

Real data of task , but only one task in database

Actions

+Accept_job
+ Reject_job
+ upload_job

These actions apply on one real data of task only

+ Get_job
+ Get_jobs

API

Only one task
